

Woolyarns Limited

EMS

Environmental Policy

Woolyarns Limited is committed to actively working to achieve the following:

- 1) Protecting the environment and preventing pollution related to the yarn manufacturing process, and
- 2) Complying with all applicable NZ Health, Safety and Environmental legislation, and
- 3) Continually improving our performance relating to the above.

To achieve this, Woolyarns environmental commitment and objectives will be made readily available and promoted throughout the organisation.

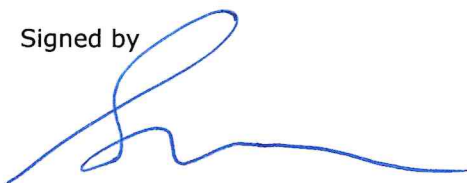

Our method to achieve the desired outcomes is:

- Regularly (at a minimum annually) assess our activities and their effects upon the environment in a systematic and logical fashion.
- Identify the actions we need to take to address each effect.
- Set targets based on the actions we need to take
- Monitor (normally monthly) our progress on each target

The key points of its strategy to achieve this are:

- Minimise waste by evaluating operations and ensuring they are as efficient as possible.
- Minimise harmful emissions through the production process including selection and use of dyestuffs, chemicals and machinery.
- Actively promote recycling both internally and amongst its customers and suppliers.
- Source and promote a product range to minimise the environmental impact of both production and distribution.
- Meet or exceed all the environmental legislation that relates to Woolyarns Limited.
